DETAILED ACTION

Claim Objections

1. Claims 2-6, 8-12, and 14-18 are objected to because of the following informalities:

Claim 2, line 9, "packet memory" seems to refer back to "packet memory" in line 5. If this is true, it is suggested to change "packet memory" to ---said packet memory---.

Claim 8, line 9, "packet memory" seems to refer back to "packet memory" in line 5. If this is true, it is suggested to change "packet memory" to ---said packet memory---.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3-18 and 20-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the classification database" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the corresponding offset values" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the corresponding offset values" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2661

Claim 6 recites the limitation "the corresponding offset values" in line 4. There is insufficient antecedent basis for this limitation in the claim. In line 3, it is suggested to change "the complete" to ---a complete---.

Claim 7 is unclear if the claim is a method or an apparatus claim. If the claim is a method claim, the steps of the claim must be clearly specified and if the claim is an apparatus claim, the structure, which goes to make up the device, must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

Claim 9 recites the limitation "the classification database" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation "the corresponding offset values" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "the corresponding offset values" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "the corresponding offset values" in line 5. There is insufficient antecedent basis for this limitation in the claim. In line 3, it is suggested to change "the complete" to ---a complete---.

Claim 20 recites the limitation "the classification database" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitation "said user" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2661

Claim 22 recites the limitation "the CAM constraint" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 23 recites the limitation "the CAM search key size" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "the classification templates" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 27, line 4, "a recordable media" is not a method step. The steps of the claim must be clearly and positively specified.

Claim 28 recites the limitation "the CAM constraint" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 29 recites the limitation "the CAM search key size" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 33, line 2, "method" should change to ---apparatus---.

Claim 34 recites the limitation "the CAM constraint" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 35 recites the limitation "the CAM search key size" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2661

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 7, 13, 19-23, 27-29, and 33-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller et al (5,938,736).

Regarding claim 1, Muller discloses a method of classifying packet information using CAM, the method comprising: receiving a set of reconfigurable selection criteria from a user wherein the set of selection criteria is limited by CAM constraint (see abstract; col. 2, lines 40-63).

Regarding claims 7 and 13, claims 7 and 13 have substantially the same limitations as claim 1. Therefore, they are subject to the same rejection

Regarding claim 19, Muller discloses a packet classifier system comprising: a CAM controlling hardware that generates a CAM search key based on a set of reconfigurable selection criteria provided by a user and a bit mask generated at run time based on the packet structure of a packet information received; and a packet memory (see abstract; col. 2, lines 40-63; col. 10, line 50-col. 11, line 5).

Regarding claim 20, Muller discloses a router or a switch comprising an integrated circuit containing a CAM controlling hardware which interfaces with an ingress manager by receiving packet information, which interfaces with a CAM to do a search or lookup on a classification database contained in the CAM, which interfaces with an action content database (RAM/Memory) to do a memory read, and which interfaces with an egress manager which sends out packet information (see abstract; figure 6; col. 2, lines 40-63; col. 10, line 50-col. 11, line 5).

Art Unit: 2661

Regarding claims 21-23, Muller discloses a method of enabling a user to reconfigure a router or a switch, the method comprising: providing a user interface wherein the user is able to define a set of reconfigurable selection criteria to determine a CAM search key; receiving the selection criteria; providing information regarding the CMA constraint wherein the CMA constraint is a CAM search key size (see abstract; figure 6; col. 2, lines 40-63; col. 10, line 50-col. 11, line 5; col. 11, lines 36-45).

Regarding claims 27-29, claims 27-29 have substantially the same limitations as claim 1. Therefore, they are subject to the same rejection

Regarding claims 33-35, claims 33-35 have substantially the same limitations as claim 1. Therefore, they are subject to the same rejection

Allowable Subject Matter

6. Claims 2-6, 8-12, 14-18, 24-26, 30-32, and 36-38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
